Table 2. Sample interview/focus group questions

Parent/carer views about a personalised care budget and rehabilitation therapy.

- explanation of personalised care (of which personal budgets are a feature)
- how would personalised care affect the current level and quality of rehabilitation support parents/children receive?
- what elements of rehabilitation support would parents use a personalised care budget?
- what elements of rehabilitation support would parents not use a personalised care budget ?
- what elements of rehabilitation support would parents expect to remain the same ?
- views on whether future rehabilitation support would be easier or harder to receive if personalised care budgets were implemented ?
- would personalised care have affected their experience of rehabilitation therapy
- would support have improved ?
- would there have been fewer gaps?
