

Continuum Sketch (2018)

By Sophie Stone

Duration: 6 minutes

Instrumentation: any flute, any clarinet, violin, cello and tam-tam for four performers

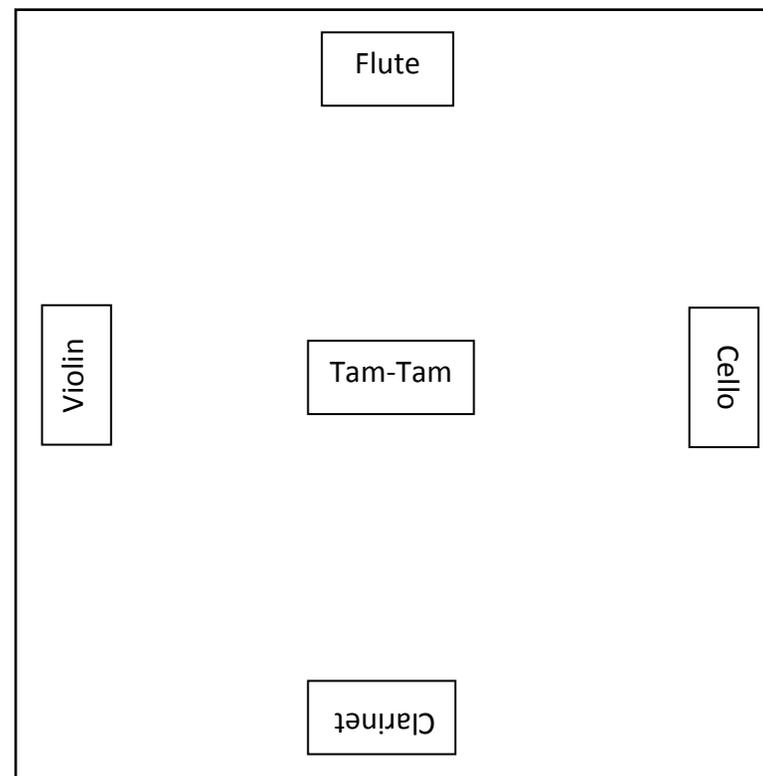

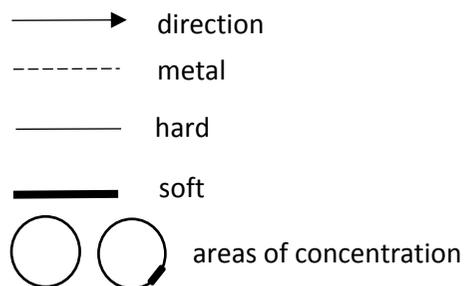

Performance set-up: the performers should sit in a square with the tam-tam in the centre facing the clarinet. The clarinet should be opposite the flute, and the violin opposite the cello (see diagram). The audience can then be immersed within the performance space on the floor or seated behind the clarinet.

Performance instructions: the performers must each use a stopwatch to start the piece (lead by the flute).

The score gives bracketed timeframes in which certain performers may play. The performers do not have to play for the whole duration of the timeframe and they may pause during the timeframe to then start performing again. Each performer can interpret their instructions in their own way.

When there is a section with more than one sound instruction, the performers can choose to perform as many as they wish (one minimum), in any order and they can be repeated. Performers may use the instrumental technique fully, intermittently, or not at all.

Tam-Tam: only one performer can use the tam-tam at one time. Each instruction for the tam-tam has its own graphic score which is interpreted by the performer. If a performer has an instruction for the tam-tam and their instrument, they may choose to perform both instructions, or one. The graphic score includes different lines for metal, hard and soft mallets. These can include traditional mallets or other objects, e.g. knitting needles and paint brushes.

0'00" 0'30" 0'45" 1'20" 1'30" 1'50" 2'15" 2'45" 3'00"

Flute

Sustain whistle tones

p

Clarinet

Sustain white/air noise and/or Tam-Tam 2

p

Violin

Circular bow the instrument body

Sustain a low pitch

pp

Sustain highest pitch possible

Cello

[*sul pont.* → *sul tasto*]

p

Sustain any pitch
